The focus is on the benefits of using natural water features. It discusses the various types of natural water features and their benefits, such as improving air quality and providing a source of relaxation and recreation. The text also mentions the importance of incorporating natural water features into urban environments to create more green spaces and enhance the overall aesthetic appeal of cities. Additionally, the text highlights the economic benefits of natural water features, such as increased property values and tourism. Overall, the document stresses the importance of preserving and promoting natural water features as an essential component of sustainable development.
Klimt's studio became a refuge for Adele and her friends.
Believe me, there were no victims.

They say now Austausch was a victim of the Nazis. Maria says, "And then [she] says, 'They took away my husband.'"
